

Code: **AP**

Retractable Core Extension

Standard extension. Flat for key position included. Hardened and ground to size. Enables a standard length of the PW up to 315mm. Keyed pocket included.

Order	A	C	R
AP.080615	8	6	1.25
AP.100815	10	8	2.0
AP.121015	12	10	2.5

S	T	U	V
9.5 x 2	M4	14	5
11.5 x 2	M5	16	6
14.5 x 2.5	M6	20	8

Mounting Example

After setting core, please machining 0.1mm from end section to make ejector effortlessly.

Sprung Core

Code: **PW**

Minimum space required for installation, only needs the space of an ejector. No milling, grinding or hardening other than the machining of detail needed. Machining for installation is easier due to always being at 90° to parting line. No need for complex mechanical systems. The opening of the sprung core is a radial movement. Due to this, at the edge of the stroke, the opening is 3.5mm (0.138"), 4.5mm (0.177") and 5.5mm (0.217"), depending on the model (K dimension in the catalogue).

Correctly installed sprung cores (following our catalogue installation instructions) can produce more than 1 million parts. (welding is not recommended on any of the sprung core products & we only recommend using Balinit C coating, other coatings are not recommended as they can reduce the sprung core life)

Material: 1.8159 **Hardness:** 45 ± 3 HRC **Max. working temperature:** 150°.

Tolerance: H7 / g6
