

Internal Latch Lock

Code: MX

Controls two stage opening of the tool. Internal mechanism. Reduced space required for installation. Developed for small / medium tools.

Can also be used to control two sets of ejection plates for two stage ejection.

Designed for two steps opening moulds. The gradual scale allows selection of the first opening. The priority of opening depends on position of assembly. More accurate first plate opening compared to other conventional systems. Scale lever indicates opening of the first plate. Reduces costs compared to conventional mechanisms.

Material: 1.2842 **Hardness:** 55 ± 3 HRC (friction area) Patented System
